

Bureau Veritas Logo now on Radoux barrels

The first European cooperage to be certified ISO 9002 in 1995, Radoux now belongs to the very restricted group of manufacturers whose **system of traceability of French wood origin** is recognized by the Bureau Veritas.

Each **« Tradition Radoux »** barrel is now marked with the Bureau Veritas logo.

Bureau Veritas ensures that the supply chain conforms to the specifications set down with regard to the traceability of the French origin of its wood through regular audits of Tonnellerie Radoux's suppliers and of its own stave mill.

This is an important step for the Radoux Group enabling them to confirm **maximum transparency** of its production and consolidate its position as **top quality cooper**.
