

NEW IDENTITY LABEL FOR OUR BARRELS

In our search for quality and ongoing improvement of our products, we are pleased to inform you that we have introduced an identity label for our barrels.

This label (3cms diameter) which is positioned at the final stages of production, replaces the previous system of marking on the bevelled edge of the top head of the barrel.

It contains all the information on traceability and technical characteristics to help us ensure identical reproducibility in the years to come.

We remain at your disposal for any further information you may require.

NB: It is crucial that this label be kept in place to ease the traceability of our product
